AFTER

# Spyder tells the truth.

## When cameras lie...

### SpyderLENSCAL™ – The Smarter Focus Tool

Razor-sharp focus for crisp detail. In still photography, SpyderLENSCAL calibrates DSLR cameras and lenses for autofocus precision, using the camera's micro-focus adjustment settings. In Video, SpyderLENSCAL is the ultimate focus-confirmation tool, coordinating with video reference display focus indicators.

### SpyderCUBE® – The Smarter Gray Card

The SMALL calibration and white balancing tool that makes a BIG impact on correct color temperature and exposure settings. Its unique multi-faceted design detects primary and secondary light sources in any situation. Portable, mountable, and extremely durable. SpyderCUBE is a favorite that belongs in every photographer or videographer's bag.

### SpyderCHECKR™ – The Smarter Color Reference

The eco-friendly, 48-color test chart. Durable, foldable, and tripod-mountable. Obtain quick, easy camera color correction with SpyderCHECKR software. Can be used for still and video work, with an increasing number of editing tools.

/// I'd say that since we purchased your products, we have increased our workflow by 100%, saving long hours of color correction, printing tests and guessing how the color would come out. Thank you for making our lives easier and making work fun again! ///  
-Horatio Franco

## When monitors lie...

### Spyder4 Monitor Devices – Easy-to-Master Monitor Calibration

The fourth generation of award winning color control. A full range of Spyder calibrators for photo enthusiasts, amateurs and professionals who want a high degree of color accuracy in their digital workflow — from capturing images and footage, to digital editing, output, and printing. Each Spyder allows simple, precise control and saves time, money, and frustration with more accurate viewing and proofing.

/// After several weeks of using the Spyder4 system, one of the things that immediately appealed to me was its simplicity. ///  
-C.S. Muncy

### SpyderTV HD™ – TV and Video Reference Display Calibration

Hi-definition screen adjustment for accurate viewing of video, from production to final viewing. TVs and Reference Displays are more realistic with incredible highlight and shadow detail when properly adjusted.

### SpyderGALLERY™ – Beautiful Tablet Color

This free app supports iOS and Android to easily calibrate tablet and phone displays for in-app viewing. Assure colors are consistent and vibrant when viewing images on your mobile devices. Available for download from the iTunes iOS App Store® or Google Play Store®.

## When printers lie...

### SpyderPRINT™ – Professional Image Output

SpyderPRINT ensures a new level of pro-quality reproduction and first-print accuracy for professional photographers and studios. The strip-reading SpyderPRINT and SpyderGUIDE eliminate the need for trial-and-error printing and allow the creation of editable ICC profiles for flawless images in minutes. Fast, accurate color and black & white profiling control allows precision and flexibility in printed output.

/// When you're a photographer who travels a lot, like myself, knowing the colors you're working with are really the colors in the print is invaluable because a professional photographer is a lot like a painter. Color is crucial to our work. ///  
-Catherine Hall
